PROFESSIONAL TESTIMONIAL

We have the opportunity to interact with Mr. Gitanj Sheth in connection with business and strategic discussions related to the real estate sector.

What particularly impressed us was his structured approach to understanding a business problem. Rather than immediately suggesting a solution, Mr. Sheth first focused on understanding the underlying business objectives, available information, market situation and operational constraints.

His ability to combine analytical thinking with technology and business understanding enabled him to bring a fresh perspective to the discussion. He was able to break down a complex issue into smaller, clearly identifiable components and discuss practical alternatives.

I found Mr. Sheth to be highly analytical, articulate and objective in his approach. His questions demonstrated strong commercial awareness and his recommendations were focused on practical implementation.

Based on my interaction with him, I believe Mr. Sheth has strong potential in management consulting, strategy, business analytics and technology-enabled business transformation.
