INSPECTOR (SI)

Our Trust had the opportunity to interact with Mr. Gitanj A. Sheth regarding business, technology and operational aspects of the education sector.

Mr. Sheth has demonstrated a very systematic approach to understanding institutional challenges. He was interested not only in the immediate problem but also in understanding the process behind it, the stakeholders involved and the potential impact of different solutions.

His technology background, combined with strong analytical thinking, allowed him to look at the problem from both operational and strategic perspectives.

We particularly appreciated his ability to ask relevant questions, analyse information objectively and communicate his observations in a simple and structured manner.

In my opinion, Gitanj possesses the qualities required for consulting-oriented work, particularly in areas involving business analysis, process improvement, technology and organisational strategy.

I would be pleased to recommend him for such professional assignments.
