PROFESSIONAL TESTIMONIAL

We have taken professional service from Mr. Gitanj Sheth for concerning market and commercial considerations in our business.

Mr. Sheth demonstrated an analytical approach to evaluating information. He was interested in understanding the assumptions behind a conclusion rather than accepting the information at face value.

He was able to look at different variables together and consider their potential commercial implications.

His ability to combine quantitative reasoning with practical business understanding was impressive.

I believe this analytical capability can be particularly valuable in strategy and consulting assignments.

All the best to Mr. Sheth for his expert journey.
