

APPRECIATION LETTER

We got the opportunity to interact with Mr. Sheth Gitanj regarding technology and business-related matters.

His computer science background is clearly reflected in his ability to understand technology-driven problems. However, what impressed me more was his ability to look beyond technology and understand the underlying business objective.

Gitanj consistently tried to connect technology, data, processes and business outcomes rather than treating them as separate subjects.

He demonstrated strong analytical thinking, logical reasoning and clarity of communication during our discussions.

We found his approach practical and outcome-oriented. He was able to understand technical concepts quickly while keeping the larger business context in consideration.

We believe Gitanj has the potential to perform strongly in technology consulting, digital transformation, business analytics and strategy.

Date: 14th September 2026

Best regards,
Rushay Trivedi
